

Montažne kuće

PROMO
Donji Vakuf

Vaša kuća ustvari je puno više od same kuće. To je mjesto odakle idete i u koje se vraćate. Nisu to samo četiri zida sa krovom, nego dom koji želite i u koji uvijek rado dolazite. Zato smo omogućili našim kupcima da sami odluče, biraju i korigiraju crteže prema vlastitim ukusima i potrebama. Naši projektanti uvijek su tu da pomognu konačno oblikovanje vaše ideje savršenog doma. Dobrodošli u Promo po svoju kuću!

Your house is so much more than a house. It is the home from which you sally forth into the world and to which you return for its safety, comfort, and privacy. It is not just a collection of walls and a roof; it is the space you yearn for, it is your hearth. This is why we give our customers the freedom to choose, play with, and decide on the house plans and drawings according to their own tastes and needs. Our designers are always here to help you realise your concept of the perfect home. Welcome to your own unique Promo house!

PROMO

Donji Vakuf

Šume pokrivaju 30% ukupne kopnene površine Zemlje, što drvo čini najrasprostranjenijim prirodnim materijalom na našoj planeti. Drvo se već vijekovima koristi za izgradnju ljudskih nastambi, a kako je veoma dostupno u prirodi, tako je i njegova upotreba raznolika i česta. Koristi se u različite svrhe, najviše u industriji namještaja i građevinarstvu. Ne postoji nijedan građevinski materijal koji bi po svojim karakteristikama bio toliko idealan kao što je to drvo. To je jedini obnovljivi građevinski materijal, za čiju obradu se potroši najmanja količina energije. Drvo svojim jedinstvenim svojstvima, omogućuje visok stepen prefabrikacije i brzu montažu, pošto faza sušenja nije potrebna kao što je to slučaj kod betonske gradnje. Posebno ima pozitivan učinak u izgradnji stambenih prostora, jer se prefabrikovanom drvenom gradnjom dobivaju zdrave i prijatne prostorije za život. Na to najviše utiče specifičnost drveta koja se ogleda u tome što ono zadržava osobine živog organizma i nakon što je posjećeno. Djeluje poput filtera koji čisti i vlaži zrak jer ima sposobnost da upija neugodne mirise, štetne pare i plinove. Zato mi u Promo-u više od 50 godina koristimo upravo drvo kao osnovni konstruktivni materijal u proizvodnji.

Forests cover 30% of the Earth's total land mass, making wood the most widespread natural, renewable, and pliable material on our planet. Wood has been used for millennia, notably in the building of human dwellings although, since it is easily accessible in nature, its applications have been diverse and widespread: from furniture production, agricultural fencing and stabling, ship-building, the manufacture of tools, to hunting traps and weapons, as well as habitation construction. By dint of its properties, there is no material as manageable and flexible as wood. It is the renewable building material whose processing consumes the smallest amount of energy. Wood's unique characteristics make it exemplary for off-site prefabrication and on-site rapid assembly (for example there is no drying phase - compare that with proving times for concrete structures). Wood's most fitting and versatile use comes in residential buildings. It offers a healthy and natural living space, stemming from the tree's unique attributes which retain the characteristics, delight, and harmony of a living organism, even after it's been harvested. Additionally, wood acts as a filter that cleans and moisturises the air, absorbing and dealing with unpleasant odours, harmful vapours, and gases. Nothing is more beautiful and natural than wood. That's why we in Promo, over 50 years, have used wood as a main structural material in our production.

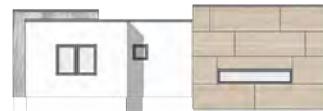

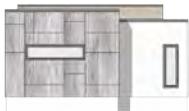

ARIA

BTP = 72 m²

Idealna minijsaturna kuća za ljubitelje moderne arhitekture, pruža osjećaj povezanosti sa okolinom, a zbog finalne obrade fasade u trespi ima nevjerojatan efekat luksuzne vile.

An ideal miniature house for all the lovers of modern architecture, gives us a great feeling of connection with the natural environment, and for its final façade known as trespa, has the amazing effect of a luxurious villa.

LILIA

BTP = 82 m²

Kuća za one koji preferiraju klasične arhitektonске oblike u koje su vješto i diskretno umetnuta dostignuća savremene gradnje.

This is a house for those who prefer a classic architectural design of skilfully and discreetly harmonised elements within a modern construction.

FASADE / FACADES

OSNOVA PRIZEMLJA (GROUND FLOOR)

1085 CM

FLORA

BTP = 83 m²

Drvena kuća jednostavne forme sa savršeno iskorištenim i funkcionalnim prostorom, uz posebnu brigu o toplini porodičnog doma kao i o stvarnoj toplini u hladnim danima.

A wooden house with a simple form, combining harmoniously the use and functionality of space, and offering not only the cosiness of family life, but also real warmth on cold days.

FASADE / FACADES

14

OSNOVA PRIZEMLJA (GROUND FLOOR)

VITA

BTP = 92 m²

Nudimo najbolji dokaz da se elegancija najlakše i najučinkovitije postiže spremnim kombiniranjem jednostavnih oblika koji, opet, u medusobnoj korelaciji tvore sasvim novi, opet jednostavan, ali i oku ugodan i raskošan oblik.

With Villa Vita we prove that elegance is easily and most effectively achieved through a skilful combination of simple forms that together create a completely unique, simple, yet dramatic and magnificent ensemble.

FASADE / FAÇADES

OSNOVA PRIZEMLJA (GROUND FLOOR)

DELTA

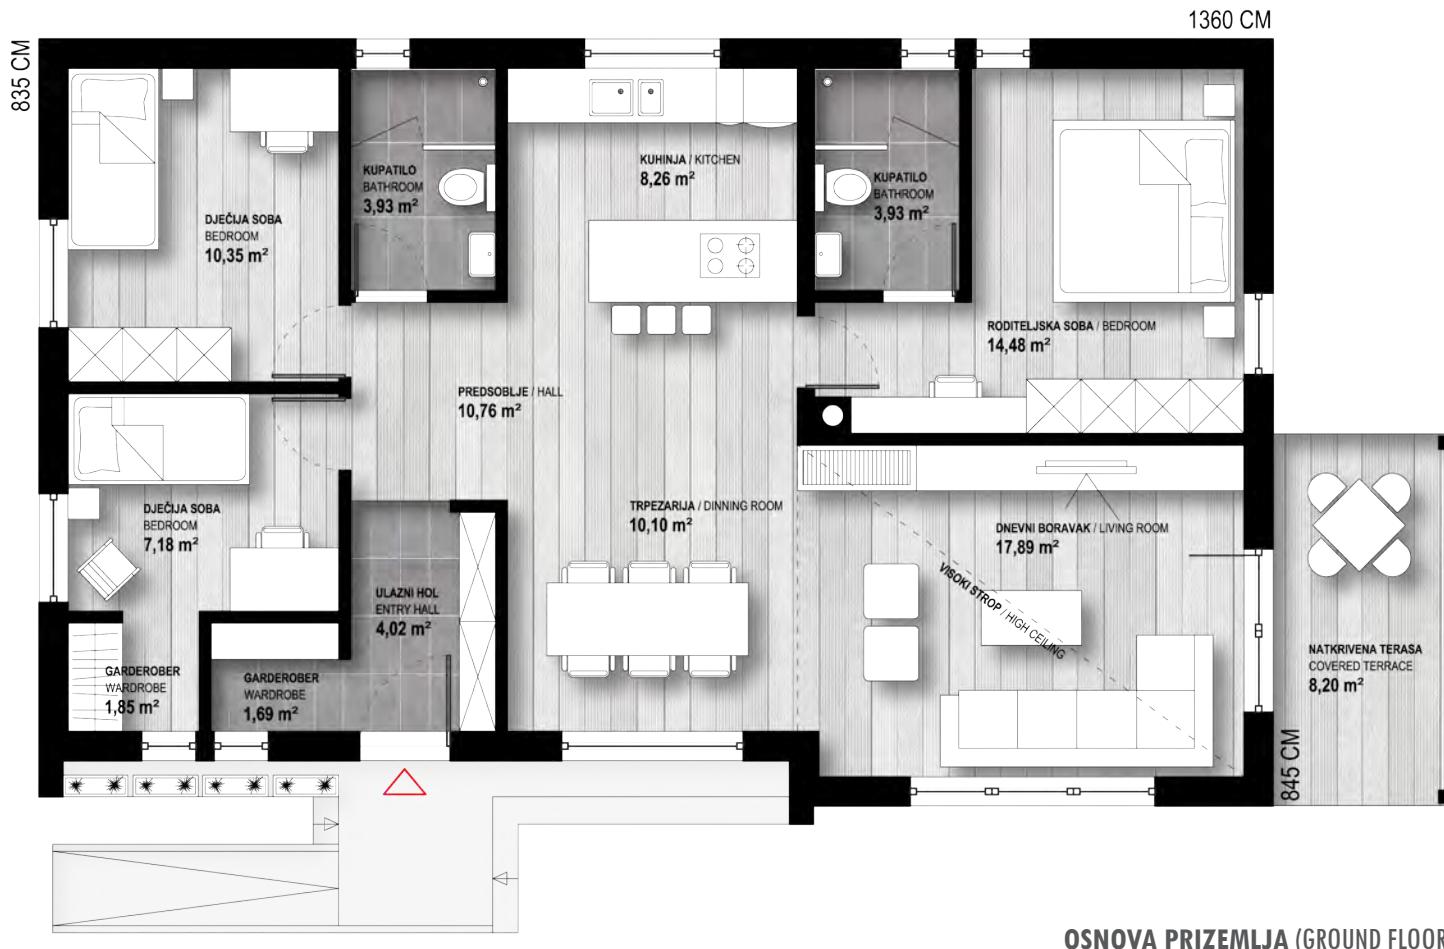

BTP = 115 m²

Elegancija i funkcionalnost udružile su se kako bi načinile idealan prostor za porodicu koja teži međusobnoj bliskosti i harmoniji.

The combination of elegance and functionality creates an ideal family space characterised by intimacy and harmony.

ASTRA

BTP = 124 m²

Kuća svojim oblikom "na lakov" i rasporedom koji prati liniju funkcionalizma sa odvojenim prostorima za dnevni boravak i za odmor, kao i prekrasnom terasom, oasisom odvojenom od pogleda idealnom za porodična druženja.

This house with its "L" shaped form has a layout following functionalism, containing a separate space for a living room, with a beautiful terrace, an oasis away from the public eye and ideal for family gatherings.

FASADE / FACADES

OSNOVA PRIZEMLJA (GROUND FLOOR)

KAISA

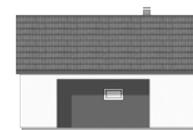

BTP = 140 m²

Ovu kuću možemo slobodno nazvati "sve u jednom", jer sadrži sve što je potrebno za život jedne porodice. Ima sve prostorije potrebne za normalno funkcionisanje, smještene u minimalni broj kvadrata, a dodatni kvalitet predstavlja vanjska ostava i carport.

We consider this house an "all-in-one" home. It has everything necessary for the everyday life of a family: spaces for easy functionality, in a minimum area, with outside storage and carport.

FASADE / FACADES

1565 CM

OSNOVA PRIZEMLJA (GROUND FLOOR)

NORDEN

BTP = 208 m²

Prostrana Villa Norden prati osnovni zahtjev privlačnosti vanjskih i unutarnjih oblika lišenih kičastih detalja koji bi remetili funkcionalnu iskorištenost prostora.

The capacious Villa Norden achieves the basic prerequisite of harmony between exterior and interior spaces, without compromising ergonomic utilisation.

FASADE / FACADES

OSNOVA PRIZEMLJA (GROUND FLOOR)

INDA

BTP = 257 m²

Ova pompežna prizmenica predstavlja idealan spoj luksusa , elegancije i modernizma, dok istovremeno odiše jednostavnost i ima gotovo savršen funkcionalni raspored.

This magnificent single-level house is an ideal mix of luxury, elegance and modernism, with a floor plan that exudes simplicity and exemplary functionality.

Drvo je vrhunski prirodni materijal sa odličnim karakteristikama. Riječ je o veoma otpornom materijalu u odnosu na svoju težinu sa izvrsnim termičkim osobinama. Vanjski zid sa drvenom konstrukcijom može biti duprolo tanji od betonskog ili zida od cigle, a da daje duplo bolju toplotnu izolaciju.

Wood is the finest natural material with superb characteristics. Its strength-to-weight ratio is exceptional, and it has phenomenal thermal characteristics. A properly constructed outer wall of wood can be twice as thin as a wall built out of cement or bricks and yet provide double the insulation.

PICCOLA

BTP = 73 m²

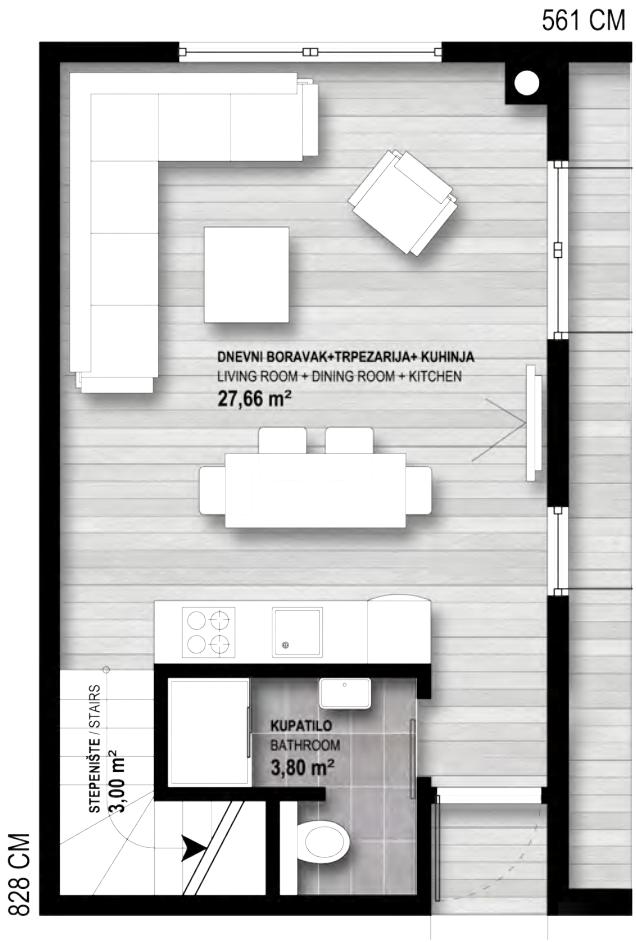

Stanovati u ovoj kući čini posebno zadovoljstvo onima kojima treba i koji vole kvalitetan odmor u lijepom okruženju, a to im svakako nudi prekrasna galerija za spavanje.

Living in this house offers a particular pleasure to those who desire quality relaxation in a beautiful setting, especially within the stunning sleeping gallery.

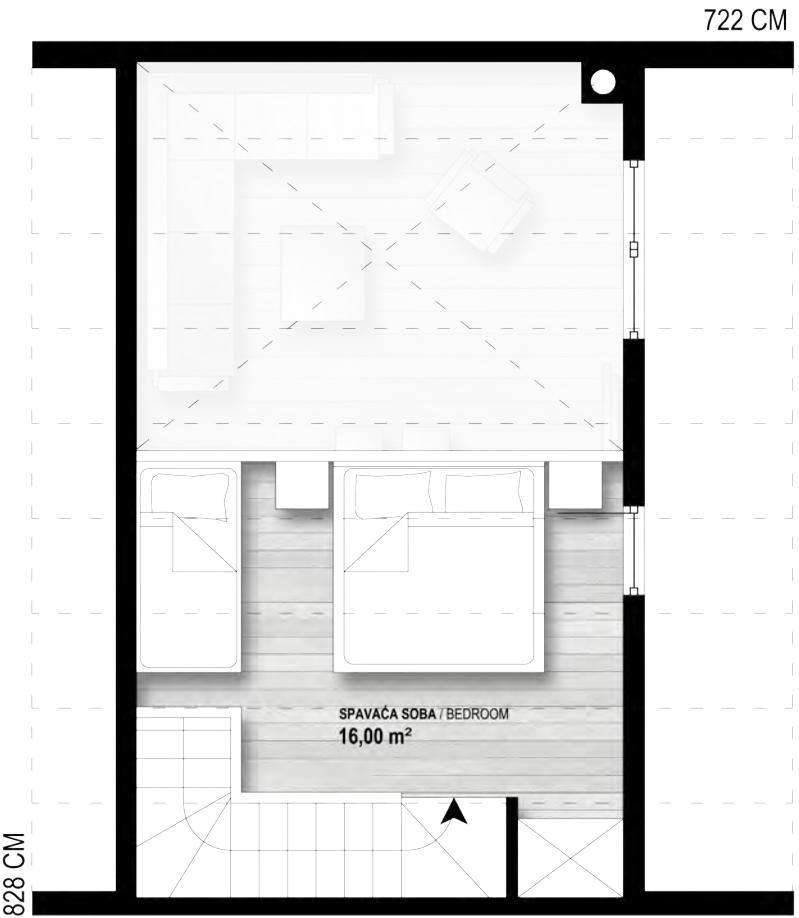

FASADE / FACADES

OSNOVA PRIZEMLJA (GROUND FLOOR)

OSNOVA SPRATA (FIRST FLOOR)

ALBA

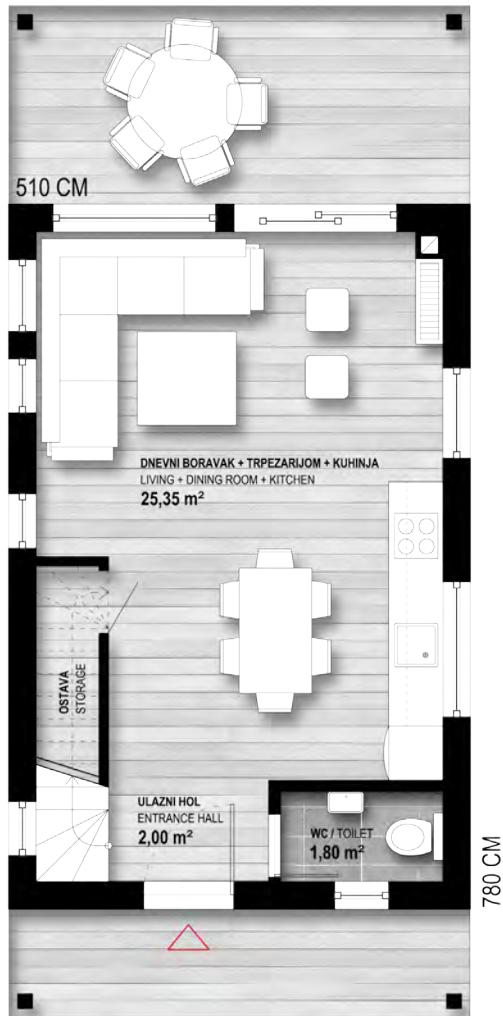

BTP = 97 m²

U kombinaciji drvne i bijele fasade, sa svojim sadržajem i rasporedom, ova spratnica je idealna za vikend kuću, a krase je i dvije terase sa obje strane tako da se dobije savršen pogled na okolinu.

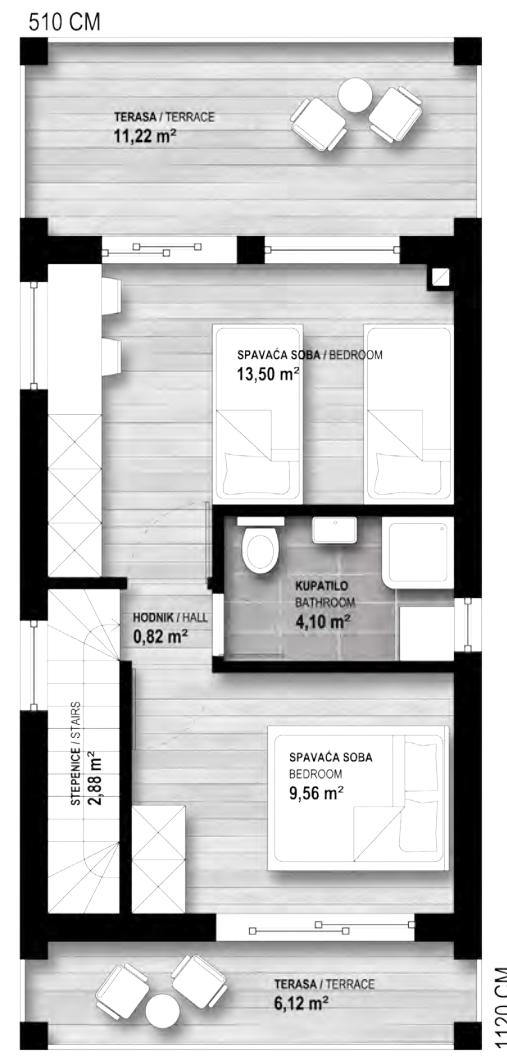

Combining a wooden and white facade, with excellent functionality in its disposition of rooms, this two-storey house makes a desirable weekend home. It has two terraces on each side, offering panoramic views over its surroundings.

OSNOVA PRIZEMLJA
(GROUND FLOOR)

OSNOVA SPRATA
(FIRST FLOOR)

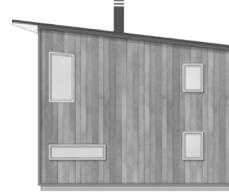

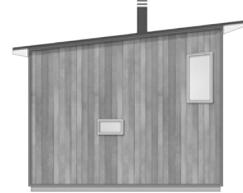

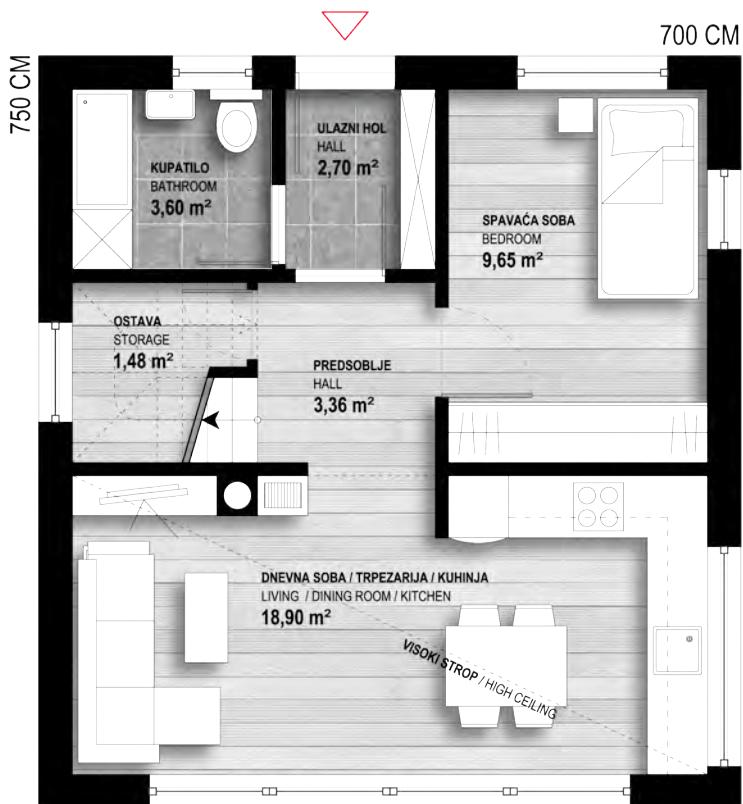

MADERA

BTP = 99 m²

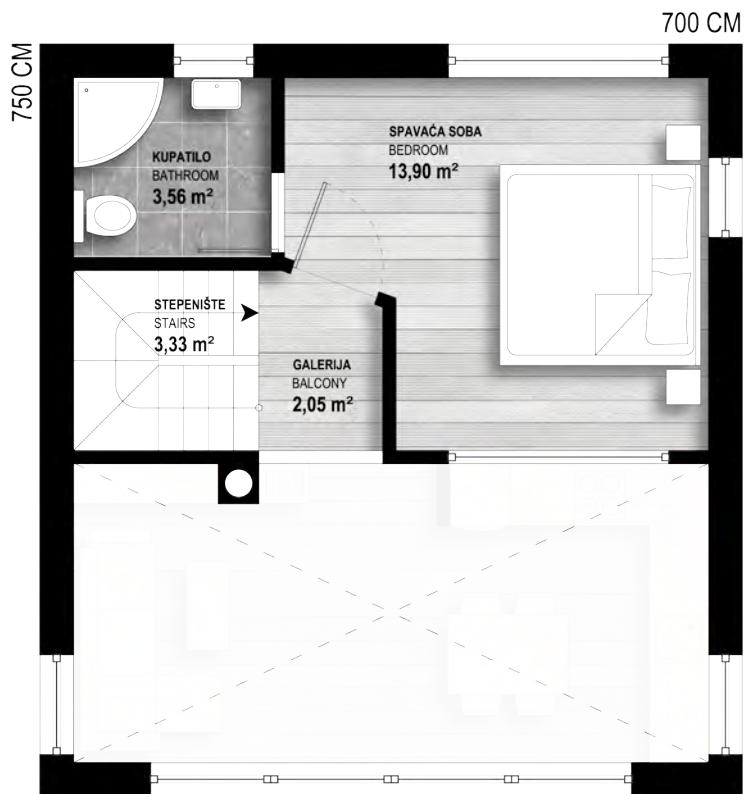

Savršena kuća za svakodnevni boravak ili za odmor koja, zahvaljujući velikim staklenim otvorima, pruža ugodni osjećaj povezanosti sa prirodnim okruženjem.

A perfect house for all-day activities and rest. With its large glass-fronted spaces, Madera gives a warm feeling of connection with its outdoor surroundings.

OSNOVA PRIZEMLJA (GROUND FLOOR)

OSNOVA SPRATA (FIRST FLOOR)

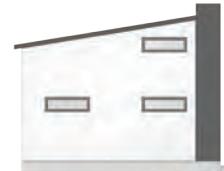

LUMINA

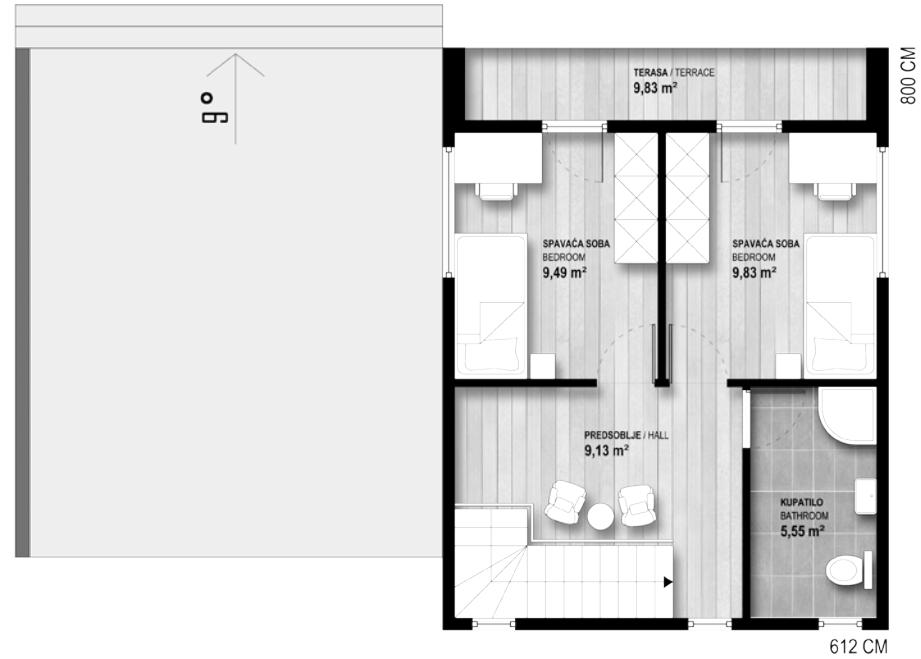

BTP = 127 m²

Kuća koju, prije svega, plijeni svojom modernošću, kako u oblikovanju eksterijera i interijera, tako i u izboru materijala za gradnju.

This house captivates and delights with its modernism and its exterior and interior design, all combined with a sensitive choice of quality construction materials.

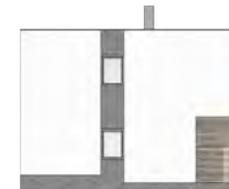

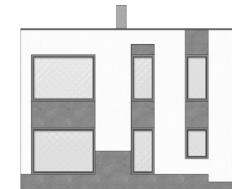

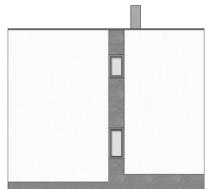

NOX

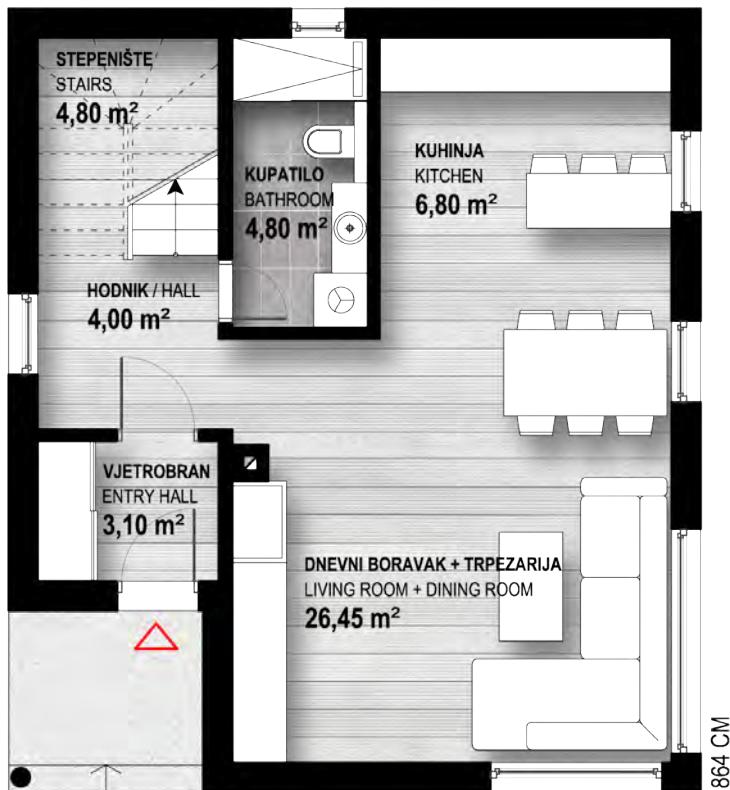

BTP = 128 m²

Idealan primjer kako se, na relativno malom prostoru, pametnim planiranjem može dobiti dom koji sadrži sve što je neophodno za ugodno porodično stanovanje.

An ideal example of space utilisation where a well-planned design generates a perfect living space in a relatively small area, offering all that is required for comfortable family living.

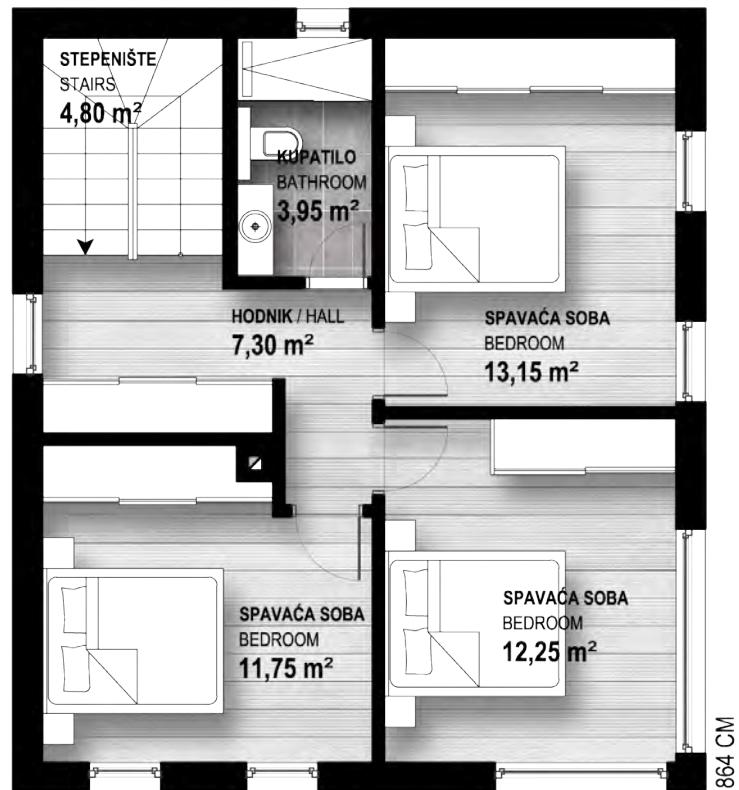

764 CM

OSNOVA PRIZEMLJA (GROUND FLOOR)

764 CM

OSNOVA SPRATA (FIRST FLOOR)

LEA

BTP = 140 m²

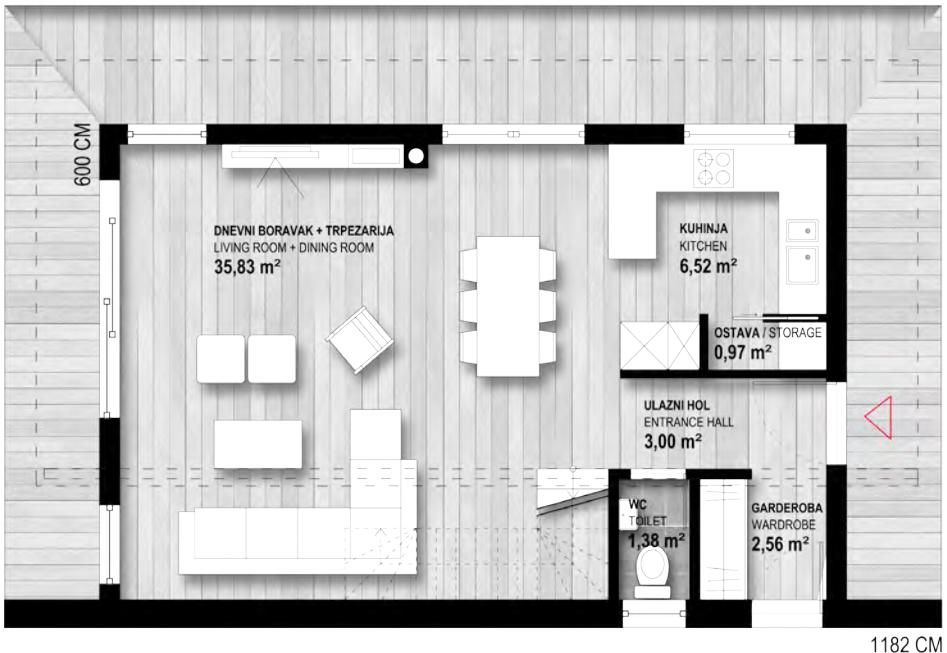

Drvena fasada u kombinaciji sa bijelom i velikim staklenim površinama čuvaju idilični osjećaj prirodne topline unutar modernog arhitektonskog dizajna oblikovanog na-savremenijim građevinskim materijalima.

The wooden façade, combined with whitened walls and large glass areas, preserve the idyllic warmth of nature inside this contemporarily designed home, constructed with the finest materials.

FASADE / FACADES

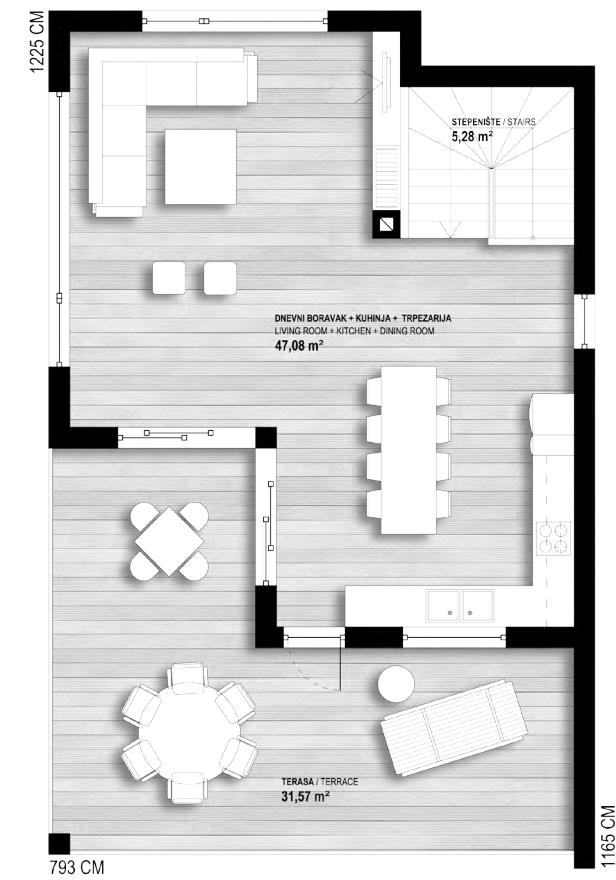

SARA

BTP = 227 m²

Sa svoje četiri spavaće sobe, svaka sa kupaonicom, te impresivnim balkonskim površinama, Sara je zasigurno prostor za one koji žele živjeti u top klasi raskoši i glamura moderne gradnje.

With its 4 en-suite bedrooms and their impressively spacious balconies, Villa Sara is designed for those who would like to live in the top echelons of luxury and glamour, constructed with contemporary materials and methods.

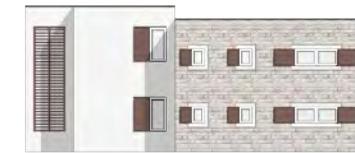

LAVANDA

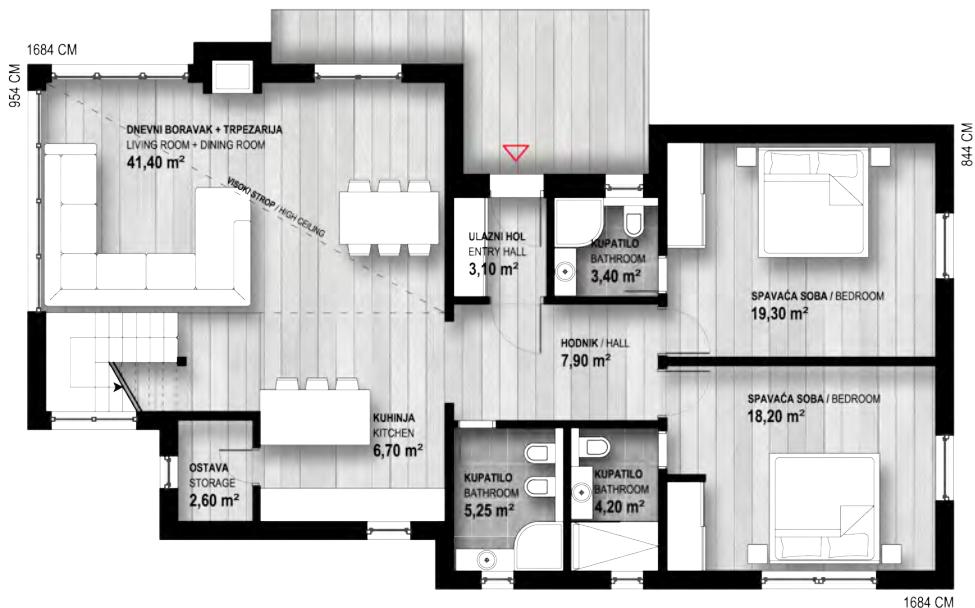

BTP = 235 m²

Biser mediteranske raskoši za one koji vole osjećaj luksusa, sa pet spavačih soba s kupatilom, te prostranim i svijetlim dnevnim boravkom visokog stropa.

The pearl of Mediterranean luxury for those who derive great pleasure from splendour; Lavanda offers 5 en-suite bedrooms and a very spacious and light family room with a high ceiling.

BOR

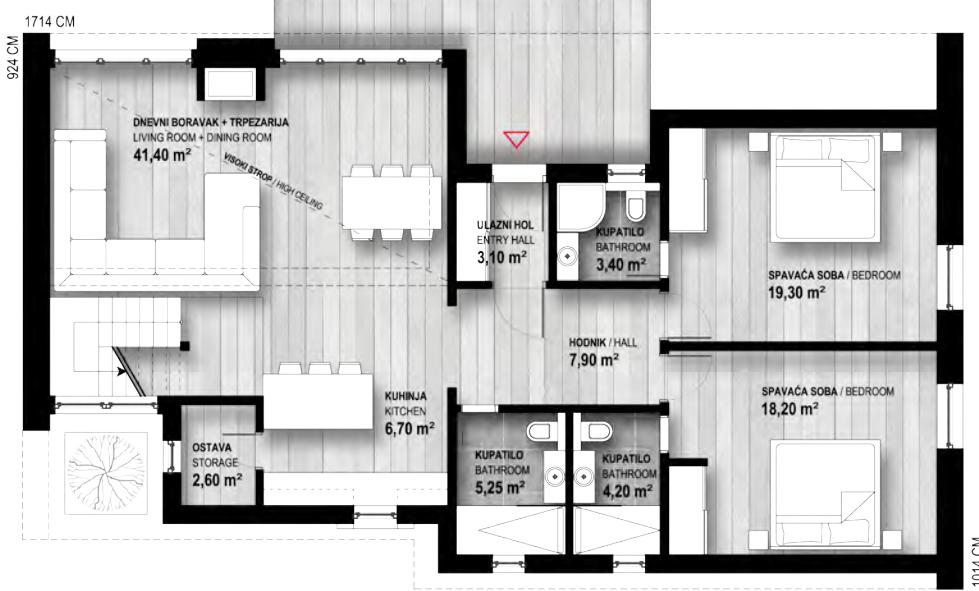

BTP = 243 m²

Raskošna, bogata kuća koja svakom njenom stanovniku, uz komotan i ugodan prostor zajednički boravak, nudi kvalitetan vlastiti intimni kutak sa kupatilima uz svaku spavaću sobu.

Aside from a comfortable and pleasant family room, this luxurious abode offers each of its inhabitants their own high quality, intimate hide-away, incorporating en-suite bedrooms.
